PROFESSIONAL SUMMARY

Telematics Engineer with a hybrid technical-commercial profile who ships customer-facing software using AI-assisted development. At Rent a Boat Salou, built the full fleet-booking platform, offline-first operational tooling, and the corporate website; on his own initiative, he has also built custom restaurant and invoicing tools for other local businesses — from scoping the problem to a working product. Background spanning cybersecurity (Deloitte, ISO 27001) and robotics (ROS2), with proven business impact (+20% revenue). Equally comfortable in front of code and in front of clients. Seeking a **Solutions / Forward Deployed Engineer** role in an AI-first startup.

EXPERIENCE

Rent a Boat Salou <i>Operations & Sales Manager — AI Product Builder</i>	Salou, Spain Jun 2022 – Present
- Designed and shipped an end-to-end fleet booking & reservation system covering the entire boat fleet, using AI-assisted development (Claude) to replace a manual, paper-based process. - Built offline-first operational tooling (staff attendance and on-site check-in) so day-to-day operations keep running without connectivity. - Designed, built and launched the company website end-to-end. - Grew annual revenue by 20% by optimizing existing channels and creating new revenue streams. - Lead full-cycle operations: P&L, fleet logistics, team supervision, and key supplier/partner negotiations.	
Universidad de Alcalá <i>Research Assistant — Robotics Group</i>	Madrid, Spain Nov 2022 – Jun 2023
- Collaborated on autonomous navigation projects (ROS2), solving complex technical problems. - Explained complex technical concepts to non-technical stakeholders, bridging tech and business.	
Hipoges Iberia <i>Cyber Security Analyst</i>	Madrid, Spain Oct 2021 – Feb 2022
- Supported ISO 27001 implementation and developed internal security policies. - Conducted vulnerability monitoring and DLP analysis, ensuring data-protection compliance.	
Deloitte España <i>Cyber Security Analyst</i>	Madrid, Spain Jan 2021 – Oct 2021
- Level 1 SOC analyst performing static and dynamic analysis of web applications (SAST/DAST). - Gained deep insight into enterprise security architecture and SaaS cloud environments.	

SELECTED PROJECTS

Independent projects and a small side venture, built on my own initiative with AI-assisted development (Claude):	
AI-powered web design (side venture) — co-founded a small initiative building client websites end-to-end with AI-assisted development. Restaurant / point-of-sale tools — order-management and operations tooling for local hospitality businesses, tailored to each one's workflow. Invoicing & billing system — automated manual administrative and accounting work for a local business.	

EDUCATION

UNIR — Universidad Internacional de La Rioja <i>Master in Commercial Direction and Sales (Expected)</i>	Remote Oct 2025 – Jul 2026
Universidad de Alcalá <i>Bachelor's Degree in Telematics Engineering</i>	Madrid, Spain 2014 – 2020
